- ◆ **Kennolyn Camp**—7,500 gpd resort in Soquel, CA
- ◆ **Farallon Island Research Station**—US Fish & Wildlife Service Facility, Farallon Island
- ◆ **Mount Madonna School**—4,000 gpd school
- ◆ **Camp Campbell**—3,200 gpd shower house facility

Landscaped Advantex System

WHAT WE DO

BONNY DOON ENVIRONMENTAL SYSTEMS, INC. (BDES) participates in all phases of on-site wastewater system projects. We refer and work closely with design professionals in preparing appropriate on-site wastewater treatment and recycling system designs. We provide technical and operational information to the regulatory community in general and as related to specific projects. Contractors are certified by **BDES** for the installation of AdvanTex® wastewater treatment systems and a qualified list can be provided. Our staff performs installation inspections to assure appropriate installation. **BDES** performs the ongoing maintenance and monitoring for the systems and reports to the appropriate regulatory authority, as needed.

Our goal is to provide a comprehensive and very professional approach to delivering on-site wastewater treatment and recycling system services for the long term. This is within the context of an overall movement toward decentralized wastewater management. We endeavor to help raise the bar in this industry as a whole.

WHO WE ARE

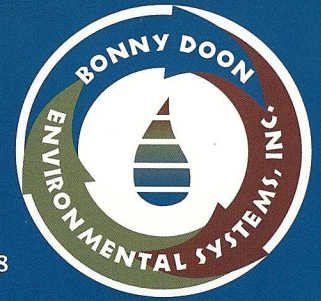

BDES is owned & operated by Patrick, Susan and David Gill. Pat has been in the water supply and wastewater industry in this area for over 32 years. He managed a small public water district for 9 years and worked in local County Environmental Health Services for over 14 years.
